

Key investor information.

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Triodos Sterling Bond Impact Fund, a sub-fund of Triodos SICAV I.

GBP Class K retail-distribution - ISIN LU2113918630.

This fund is an undertaking for collective investment in transferable securities and is managed by Triodos Investment Management BV.

Objectives and investment policy.

Investment objective

The Sub-Fund aims to maximise positive impact in alignment with the investment policy and to generate long-term capital growth for its investors.

Investment policy

Triodos Sterling Bond Impact Fund primarily invests in British Pound-denominated corporate bonds, impact bonds, sovereign bonds and sub sovereign bonds that combine good financial results with a good performance on environmental, social and governance issues. At least 95% of the bonds must be rated investment grade (\geq BBB or equivalent). The fund may however invest up to 5% of its net assets in corporate bonds and impact bonds that are non-rated or below investment grade. On average, 30% of the fund's net assets are invested in sovereign bonds and 70% in corporate bonds and sub sovereign bonds issued by international financial institutions and (semi-)public institutions. Companies, international financial institutions and (semi-)public institutions are selected following a comprehensive and integrated assessment of their financial, social and environmental performance. Countries and their regions must meet the minimum standards defined.

The fund is actively managed. It compares its returns with the Bloomberg Barclays UK Gilt 1-5 year Total Return Unhedged GBP index (50%) and the Bloomberg Barclays Sterling Non-Gilts Total Return Value Unhedged GBP index (50%). The fund does not aim to replicate or outperform the

benchmark, from which it may deviate because it only invests in bonds that meet strict sustainability criteria.

Sustainable investment strategy

The sustainability research process for corporates and sub sovereigns issued by international financial institutions and (semi-)public institutions includes the following two steps: (1) selection of companies that materially contribute to at least one of the seven transition themes (sustainable food & agriculture, sustainable mobility & infrastructure, renewable resources, circular economy, prosperous & healthy people, innovation for sustainability, and social inclusion & empowerment) through their products, services or processes, and (2) elimination of companies that do not meet the minimum standards defined. Sovereign bonds and sub sovereign bonds issued by regional or local authorities must be issued by the United Kingdom and/or regional or local authorities of members of the European Union that meet the minimum standards defined. For impact bonds the steps are (1) elimination of issuers that do not meet the minimum standards defined, (2) selection of bonds that invest in projects with measurable positive impact and (3) selection of bonds with sustainable processes.

Other information

- Investors may subscribe and redeem units on any valuation day.
- Distribution shares may pay a dividend to their holders whereas capitalisation shares capitalise their entire earnings.

Risk and reward profile.

The risk and reward indicator is based on the volatility of the fund. Historical data may not be a reliable indicator of the future risk profile of the fund. The above risk and reward category is not fixed and may shift over time. The lowest category does not mean a risk-free investment.

The risk and reward indicator is set at 3 as bond funds in general are less volatile than equity funds. Corporate issued investment grade bonds are more risky and therefore could show increased volatility compared to sovereign bonds.

Other risks relevant to the investor

- The value of investments in bonds made by the fund may vary inversely with changes in interest rates. The fund mitigates this risk by means of careful selection and diversification of investments.

For a complete overview of all the risks attached to this fund, please refer to the section Risk Factors in the prospectus.

Charges.

The charges are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	%
Entry charge	N/A
Exit charge	N/A
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out	
Charges taken from the fund over a year	%
Ongoing charges	0.75
Charges taken from the fund under certain specific conditions	%
Performance fee	N/A

The fund does not charge entry and exit fees. However, financial advisers or distributors may do so. You can obtain the actual entry and exit fees from your financial adviser or distributor.

The ongoing charges figure shown here is an estimate based on the expected total of charges. Due to the amendments made to the fund charges as per 1 January 2021, the ex-post figure is no longer reliable. The fund's annual report for each financial year will include detail on the exact charges made.

The fund does not charge a performance fee.

For more information about charges, please see the relevant page(s) of the fund's prospectus, which is available on www.triodos-im.com

Past performance.

As the fund does not yet have performance data for one complete calendar year, there is insufficient data to provide a useful indication of past performance to investors.

Practical information.

- RBC Investor Services Bank SA acts as depositary of the fund.
- The English prospectus, annual and semi-annual accounts may be obtained free of charge on www.triodos-im.com.
