

Key investor information.

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Triodos Sustainable Equity Fund, a sub-fund of Triodos SICAV I.

GBP Class K retail-distribution - ISIN LU0785617266.

This fund is an undertaking for collective investment in transferable securities and is managed by Triodos Investment Management BV.

Objectives and investment policy.

Investment objective

The fund aims to generate long-term capital growth for its investors through a portfolio that is well diversified across economic sectors and geographical regions.

Investment policy

Triodos Sustainable Equity Fund invests in equities of companies listed on worldwide markets. At least 67% of the fund's net assets are invested in shares of large cap companies and up to 33% of its net assets in shares of small and mid cap companies. Companies are selected following a comprehensive and integrated assessment of their financial, social and environmental performance.

Sustainable investment strategy

The sustainability research process includes the following two steps: (1) selection of companies that derive revenues from products and services that contribute solutions to the transition to a sustainable world, and (2) elimination of companies that do not meet the minimum standards defined. Where appropriate, the fund will seek to discuss substantial and relevant issues with regard to social, environmental and governance performance with the companies analysed.

Other information

- Investors may subscribe and redeem units on any valuation day.
 - Distribution shares may pay a dividend to their holders whereas capitalisation shares capitalise their entire earnings.
-

Risk and reward profile.

The risk and reward indicator is based on the volatility of the fund. Historical data may not be a reliable indicator of the future risk profile of the fund. The above risk and reward category is not fixed and may shift over time. The lowest category does not mean a risk-free investment.

Equity funds in general are more volatile than bond funds. Equity funds with a global focus on developed markets are well diversified over countries and sectors making them less sensitive to price movements within the equity fund range.

Other risks relevant to the investor

- Currency risk arises because investments by the fund may be denominated either in euros or in foreign currencies. In principle, the fund does not hedge the currency risk of these investments.
- The fund is subject to market risk, which is the risk caused by changes in the price of the investments. The fund mitigates this risk by means of careful selection and diversification of investments.

For a complete overview of all the risks attached to this fund, please refer to the section Risk Factors in the prospectus.
