# What is this product?

Type: Triodos Sterling Bond Impact Fund is an open-ended sub- the price changes of the investments. The return of the fund fund of a Luxembourg SICAV.

Management is not entitled to terminate the fund unilaterally.

Objectives: The fund aims to increase the value of your investment over the medium term, while seeking to maximise positive impact on society and the environment. The fund has sustainable investment as its objective as set out in article 9 SFDR. The fund mainly invests in impact and other corporate bonds and government bonds. The proceeds of the impact and corporate bonds must finance projects that contribute to at least one of the following transitions (as defined by Triodos): resource transition, energy transition, food transition, societal transition or wellbeing transition. Issuers that do not meet the Triodos sustainability standards are excluded from investment. Bonds can be issued by corporate bodies or governments. All bonds must be investment grade and denominated in GBP. The return of the fund is determined on the one hand by interest income from investments minus the costs of managing the fund, and on the other hand by

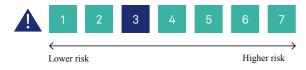

depends to a large extent on interest rate developments. The fund is actively managed. It compares its returns with the Bloomberg Term: The fund has no maturity date. Triodos Investment Barclays UK Gilt 1-5 year Total Return Unhedged GBP index (50%) and Bloomberg Barclays Sterling Non-Gilts Total Return Value Unhedged GBP index (50%), which it does not aim to replicate or outperform. The fund may deviate from the benchmark because it only invests in companies that meet strict sustainability criteria.

> Intended retail investor: The fund is available to retail and institutional investors through all distribution channels, with or without advice. The fund may appeal to investors who:

- are looking for an investment combining income and growth that takes a sustainable investing approach;
- · are interested in exposure to developed and impact bond markets, either for a core investment or for diversification;
- · have a medium risk profile and can tolerate moderate temporary losses.

Orders to buy and sell shares are ordinarily processed on any day that is a banking day in Luxembourg. Capitalisation share classes reinvest the fund's net realised income, while distribution share classes may distribute it.

# What are the risks and what could I get in return? **Risk Indicator**

The risk indicator assumes you keep the product for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that

the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level. The product may be exposed to risks, such as concentration risk and interest rate risk. This product does not include any protection from future market performance so you could lose some or all of your investment.

#### **Performance Scenarios**

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: Example Investment:		3 years GBP 10,000	
Scenarios		If you exit after 1 year	If you exit after 3 years
Stress	What you might get back after costs  Average return each year	<b>GBP 8,397</b> -16.0%	<b>GBP 8,320</b> -5.9%
Unfavourable	What you might get back after costs  Average return each year	<b>GBP 8,397</b> -16.0%	<b>GBP 8,320</b> -5.9%
Moderate	What you might get back after costs  Average return each year	<b>GBP 10,212</b> 2.1%	<b>GBP 10,744</b> 2.4%
Favourable	What you might get back after costs  Average return each year	<b>GBP 11,032</b> 10.3%	<b>GBP 11,676</b> 5.3%

what you might get back in extreme market circumstances.

This type of scenario occurred for an investment between The figures shown include all the costs of the product itself, but may November 2013 and November 2023. The stress scenario shows not include all the costs that you pay to your advisor or distributor.
